

Can your flare have too much capacity? The answer is no!
Can you have more than you normally need? Yes, and you should.

Introducing the "Responder Flare"

The only 1" flare on the market!

When you need to reduce a propane tanks volume or drop the pressure quickly to protect lives and property, there's really only one choice!

Flare over 1000 GPH
Produce over 91,000,000 BTU Hour

**Force auto-refrigeration quicker
by moving more PROPANE**

- Flare Vapor or Liquid
- Stainless Steel Burner - Able to withstand burning liquid run down
- Reduce a tanks internal pressure rapidly using 1 inch hose and piping
- Easy set up - No tools required
- Pilot flare to maintain main burner flame
- Reflective markings (be seen while setting up)
- Maintain vertical on grades up to 20 degrees

The choice of HazMat Teams
